
Education

2007-2009 **MSc - Applied Mathematics, Research area: Mathematical Biology**, *The University of Western Ontario*, London, Ontario.

Thesis Topic: The Evolution of Cooperation on Bipartite Graph Structures

2003-2007 **BSc - Mathematics**, *Trent University*, Peterborough, Ontario.

Dean's Honour List, 2003-2007

Select Courses Taken: Groups, Rings and Fields, Introduction to Topology, Introduction to Dynamical Systems
Mathematical Modelling

Relevant Experience

October 2023–October 2025 **Senior Software Engineer in Test**, *ContactMonkey*, Toronto, Canada.

As a senior software engineer in test, I was responsible for establishing end-to-end test automation as well as building quality engineering overall in a growing engineering organization.

October 2022–May 2023 **Developer Advocate**, *Code Intelligence*, Bonn/Remote, Germany/Canada.

As a developer advocate at an early-stage startup, I focused on content engineering. This included written and video content based on fuzzers generally and Code Intelligence's main product CIFuzz in particular.

March 2018–August 2022 **Solution Architect**, *Sauce Labs*, San Francisco/Remote, USA/Canada.

In this customer-facing role, I provided post-sale technical guidance and advice to enterprise customers working with Sauce Labs. This included developing best practices for Sauce products, troubleshooting test automation issues and demoing new and existing features to existing customers.

April 2017–February 2018 **Test Developer**, *JUICE Mobile*, Toronto, Ontario.

I worked with a programmatic advertising platform, primarily developing a service-level or API test framework in Python. I worked on a team of 10 developers as an "embedded" test development specialist.

October 2010–October 2016 **Test Developer**, *CaseWare International*, Toronto, Ontario.

I worked primarily with the CaseWare Time product. I wrote and maintained automated regression and acceptance tests, emphasizing maintainability in my test code. This included working with Java-based Selenium tests for Time on the Go, Time's web-based version and SilkTest suites for Time, the primary desktop product.

What I'm Looking For:

- Professional Mathematical Tutoring: People in industry may still have gaps in mathematical knowledge, and I would like to help them understand concepts that fill these gaps.
- Mathematics for Artists: Overlap between mathematics and the arts is significant. I would like to approach problems of mathematics from an artistic perspective.
- Python: I've been working with Python professionally for 8+ years and would enjoy working with it in a mathematical context.

What I've Done, in Chronological Order

- Built an API test framework for a programmatic ad platform product using Python. This tested the API layer of the internal application using approximately 200 tests with Pytest and requests.

- o Designed and delivered a standard presentation on best practices in Continuous Integration/Continuous Deployment. This presentation was delivered as part of solution architecture work to enterprise company customers such as Accenture and at tech conferences such as Targeting Quality by KWSQA.
- o Designed and delivered a presentation called "What the Fuzz? An Introduction to Fuzz Testing". This talk was delivered at multiple meetups including PyLadies Toronto and BSides Rochester.
- o Working towards self-teaching myself Galois Theory based on the notes of Tom Leinster of the University of Edinburgh.

Interests

Food	I enjoy eating and cooking food of all kinds. Currently living in Toronto which an excellent food city overall.
Art	Current interests include work by Agnes Martin, Josef Albers and modernist abstraction.
Linear Algebra	Underappreciated but also incredibly useful.
