
Relevant Experience

- October 2022–May 2023 **Developer Advocate**, *Code Intelligence*, Bonn/Remote, Germany/Canada.
As a developer advocate at an early-stage startup, I focused on content engineering. This included written and video content based on fuzzers generally and Code Intelligence's main product CIFuzz in particular.
- March 2018–August 2022 **Solution Architect**, *Sauce Labs*, San Francisco/Remote, USA/Canada.
In this customer-facing role, I provided post-sale technical guidance and advice to enterprise customers working with Sauce Labs. This included developing best practices for Sauce products, troubleshooting test automation issues and demoing new and existing features to existing customers.
- October 2023–October 2025 **Senior Software Engineer in Test**, *ContactMonkey*, Toronto, Canada.
As a senior software engineer in test, I was responsible for establishing end-to-end test automation as well as building quality engineering overall in a growing engineering organization.
- April 2017–February 2018 **Test Developer**, *JUICE Mobile*, Toronto, Ontario.
I worked with a programmatic ad platform, primarily developing a service-level or API test framework in Python. I worked on a team of 10 developers as an "embedded" test development specialist.
- October 2010–October 2016 **Test Developer**, *CaseWare International*, Toronto, Ontario.
I worked primarily with the CaseWare Time product. I wrote and maintained automated regression and acceptance tests, emphasizing maintainability in my test code. This included working with Java-based Selenium tests for Time on the Go, Time's web-based version and SilkTest suites for Time, the primary desktop product.

Education

- 2007-2009 **MSc - Applied Mathematics**, *The University of Western Ontario*, London, Ontario.
Research area: Mathematical Biology
- 2003-2007 **BSc - Mathematics**, *Trent University*, Peterborough, Ontario.
Dean's Honour List, 2003-2007

What I'm Looking For:

- Solution Architecture: I love building elegant solutions for complex technical problems
- Delighting Customers: Providing customers with solutions and a helping hand
- Creating Technical Guides: Technical references are great! Let's have more of them

Deep Dive on Solution Architect Work

- At Sauce Labs, I worked with a major American bank to implement and maintain a custom networking solution for use with our flagship product. This required both strong technical knowledge and corporate communications skills
- Also at Sauce Labs, I took on primary responsibilities to be the subject matter expert in Python-based solutions for our multi-language product and customers.
- At Code Intelligence, I worked with the marketing team to create strategic guides on technical subjects to both demonstrate our product and promote good fuzz testing practices.

Public Speaking

- o Spoke at [Targeting Quality 2025](#), delivering the talk "Modern
- o Spoke at [PyBay 2024](#) with the talk [PyTest: The Improv Way](#)
- o Spoke at SauceCon 2022 with the talk [Selenium in the Clouds](#)

Video Content

- o Find me on [TikTok](#)

Interests

- Food I enjoy eating and cooking food of all kinds. Currently living in Toronto which an excellent food city overall.
- Art Current interests include work by Agnes Martin, Josef Albers and modernist abstraction.
- Being Online I am quite active on social media, including Mastodon mastodon.social/@joshin4colours
