

Relevant Experience

- October 2023–October 2025 **Senior Software Engineer in Test**, *ContactMonkey*, Toronto, Canada.
As a senior software engineer in test, I was responsible for establishing end-to-end test automation as well as building quality engineering overall in a growing engineering organization.
- October 2022–May 2023 **Developer Advocate**, *Code Intelligence*, Bonn/Remote, Germany/Canada.
As a developer advocate at an early-stage startup, I focused on content engineering. This included written and video content based on fuzzers generally and Code Intelligence's main product CIFuzz in particular.
- March 2018–August 2022 **Solution Architect**, *Sauce Labs*, San Francisco/Remote, USA/Canada.
In this customer-facing role, I provided post-sale technical guidance and advice to enterprise customers working with Sauce Labs. This included developing best practices for Sauce products, troubleshooting test automation issues and demoing new and existing features to existing customers.
- April 2017–February 2018 **Test Developer**, *JUICE Mobile*, Toronto, Ontario.
I worked with a programmatic ad platform, primarily developing a service-level or API test framework in Python. I worked on a team of 10 developers as an "embedded" test development specialist.
- October 2010–October 2016 **Test Developer**, *CaseWare International*, Toronto, Ontario.
I worked primarily with the CaseWare Time product. I wrote and maintained automated regression and acceptance tests, emphasizing maintainability in my test code. This included working with Java-based Selenium tests for Time on the Go, Time's web-based version and SilkTest suites for Time, the primary desktop product.

What I'm Looking For:

- Creating Technical Guides: Technical references are great! Let's have more of them
- Creating Video Content: Developers like watching videos for tips and training, and I can help make those videos
- Social Media Opportunities: Let's make some great tweets

Tools I've Used

- Camtasia, for creating captivating video content
- TikTok, for creating short form video
- Visual Studio Code, for writing and presenting code

Video Content

- Spoke at [Targeting Quality 2025](#), delivering the talk "Modern
- Spoke at [PyBay 2024](#) with the talk [PyTest: The Improv Way](#)
- Spoke at SauceCon 2022 with the talk [Selenium in the Clouds](#)
- Find me on [TikTok](#)

Writing & Social Media

- [The Rise and Fall of Protractor](#)
- [Covering Targeting Quality on Mastodon](#)

- [Some tweets from attending PyBay in San Fransisco](#)

Interests

- Food I enjoy eating and cooking food of all kinds. Currently living in Toronto which an excellent food city overall.
- Art Current interests include work by Agnes Martin, Josef Albers and modernist abstraction.
- Being Online I am quite active on social media, including Mastodon mastodon.social/@joshin4colours

Education

- 2007-2009 **MSc - Applied Mathematics**, *The University of Western Ontario*, London, Ontario.
Research area: Mathematical Biology
- 2003-2007 **BSc - Mathematics**, *Trent University*, Peterborough, Ontario.
Dean's Honour List, 2003-2007
